EPTA FOOD DEFENCE
an innovative antibacterial system
for MISA refrigerated cold rooms
that was devised to improve the quality
and healthiness of products.

It is able to prevent and actively combat
many species of bacteria, including
the best known dangerous varieties.

The activity of the treatment **is permanent,**
24 hours a day, 7 days a week:
the treatment doesn't need to be
regenerated and lasts for
the entire service life of the cold room.

The film is suitable for contact with foodstuffs
and substances for personal use in conformity with
D.M. 21 March 1973 and as amended and EU Directives
78/142/EEC, 80/766/EEC, 82/711/EEC, 85/572/EEC,
90/128/EEC, 92/39/EEC.
